BANDARI VAMSHI KRISHNA

bvamshikrishna300@gmail.com || (+44) 7587799298 || https://www.linkedin.com/in/vamshi-krishna-bandari-623580212/

SUMMARY

Data-driven professional with more then 1 year of experience at Cognizant, skilled in Python, SQL, Power BI, Tableau, and MS Excel. Handson experience in data transformation, analytics, reporting, and workflow automation using Zapier and Make. Proficient in AI/ML, NLP, LLMs, and generative AI, with a passion for leveraging data and AI to generate actionable insights and drive business impact..

WORK EXPERIENCE/PROJECTS

Process Executive – Data (Google Maps Business Verification Project)
Cognizant Technology Solutions | ***JAN 2024 – AUG 2025***

- Led the Google Maps Business Verification process, analyzing and validating business information across multiple data sources, including official government websites, business portals, and mapping tools, ensuring compliance with Google's data integrity and local regulatory standards.
- Utilized internal and third-party platforms to perform abuse detection, address verification, and data quality checks, improving the accuracy and reliability of verified business listings.
- Conducted data-driven decision-making through ad-hoc analysis, reporting, and performance tracking—enhancing process transparency and stakeholder confidence.
- Developed and maintained data documentation, rule-based workflows, and automated scripts to streamline repetitive validation tasks, reducing processing time by 30%.
- Within a short period, promoted to PL (Pod Lead), leading and mentoring a team of 15 analysts—overseeing task allocation, quality reviews, and performance management to ensure SLA adherence and operational efficiency.
- Collaborated with cross-functional teams to identify process bottlenecks and implement continuous improvements that boosted productivity and ensured data governance compliance.

EDUCATION

University of Roehampton, London, UK — M.Sc. Artificial Intellige ***September 2025 – Present***

- Currently pursuing advanced coursework in Artificial Intelligence, including Machine Learning, Deep Learning, and Data Analytics.
- Completed projects involving predictive modeling, AI algorithms, and data visualization using Python and related libraries.
- Developing skills in real-world AI applications, preparing for data-driven problem solving in professional environments.

Institute Of Aeronautical Engineering College, B.tech In Electrical And Electronics engineering **7.35 CGPA**

2019 - 2023

- Secured **2nd place** in an **inter-college Data Analytics Hackathon**, hosted by Institute of Aeronautical Engineering College , by building a real-time dashboard and predictive model 22using **Python** and **Power BI**.
- Successfully completed a final-year project on **"Smart Energy Meter Data Analysis"**, utilizing **Python** and **Power BI** to analyze usage trends and propose energy-saving recommendations.

PROJECTS

A Comparative Evaluation of Particle Swarm Optimisation & Ant Colony Optimisation – Renewable Energy Scheduling | Nov 2025 – Jan 2026

University of Roehampton

- Developed an optimisation framework to improve renewable energy scheduling efficiency.
- Conducted comparative analysis of PSO and ACO for resource allocation and load balancing.
- Implemented algorithms, tuned parameters, and evaluated performance (convergence speed, solution quality) using Python.
  Skills: Python, Renewable Energy, Optimization

Rational Agent Framework for Credit Risk Prediction | Oct 2025 – Jan 2026

University of Roehampton

- Built ML-based framework to predict credit risk using Naive Bayes, Random Forest, and KNN.
- Evaluated models with accuracy, precision, recall, ROC-AUC, and confusion matrix analysis.
- Focused on interpretable AI for financial risk assessment using Python.
  Skills: Python, AI, Machine Learning

SKILLS

- **Artificial Intelligence & ML:** Machine Learning fundamentals, Neural Networks, CNNs
- **Deep Learning Frameworks:** PyTorch
- **AI Tools:** ChatGPT, GPT models, Prompt Engineering
- **Data Analytics & Visualization:** Power BI, Tableau, MS Excel (Pivot Tables, Dashboards)
- **Programming & Databases:** Python (Pandas, NumPy, Matplotlib), SQL (Joins, CTEs), Microsoft SQL Server, Google Sheets
- **Automation & Workflow Tools:** Zapier, Make (Integromat), ETL Processes
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration

CERTIFICATIONS & VIRTUAL INTERNSHIPS

- **Career Essentials in Generative AI** – *Microsoft & LinkedIn* (Oct 2025)
  Skills: Prompt Engineering, Microsoft Copilot
- **Intro to Generative AI: A Beginner's Primer on Core Concepts** – *Google Cloud Skills Boost* (Oct 2025) *Skills:* Generative AI, LLMs, NLP, Responsible AI
- **Introduction to Artificial Intelligence** – *LinkedIn* (Oct 2025) *Skills:* AI Literacy
- **Cloud Technical Series – AI Agents Edition** – *Google Cloud Asia Pacific* (Aug 2025)
- **Ethics in the Age of Generative AI** – *LinkedIn* (Aug 2025) *Skills:* Responsible AI, Computer Ethics
- **Oracle Fusion AI Agent Studio Foundations Associate (Rel 1)** – *Oracle* (Aug 2025)
- **Data Analytics Job Simulation** – *Deloitte Australia (Forage)* (Mar 2025)
